# INFLUENCERS ENDING CANCER

---

We are a charity looking to raise funds to back one of the most anticipated medical advancements for dogs ever developed. We are seeking \$2,000,000 for USDA approval.

We are counting on the power and reach of influencers to spread the word, so we can get this valuable vaccine to dogs today.

# SEPTEMBER IS END CANCER MONTH

Our campaign will make a HUGE push in September to gain massive awareness on canine cancer prevention.

This is the big push you can be a part of.

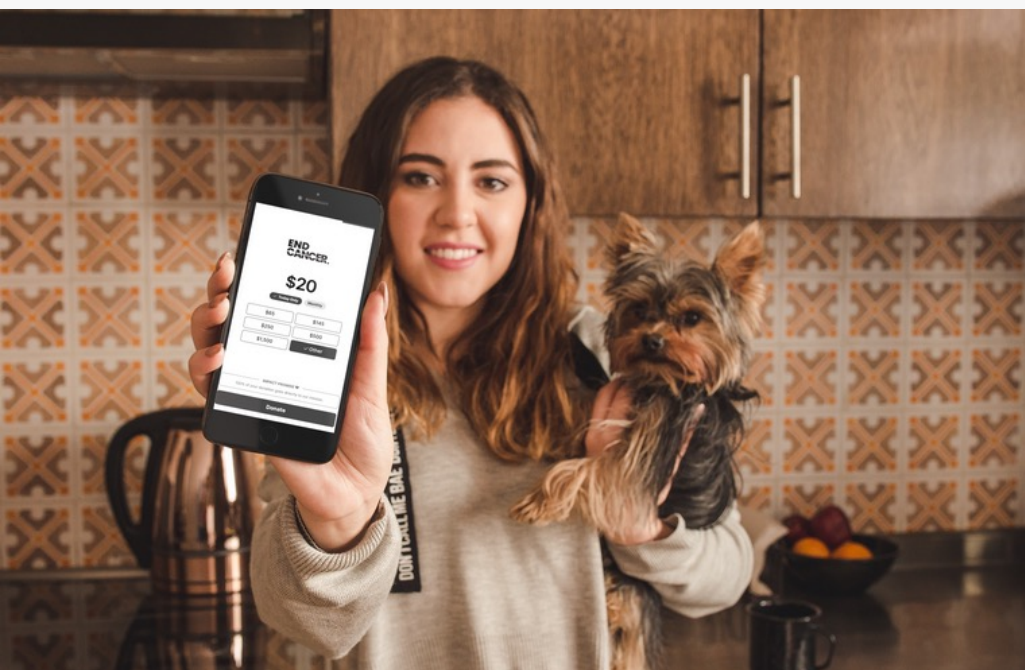

# A CUSTOM CAMPAIGN WHEN YOU JOIN US

Join us in our fight to end cancer - our team will provide you with support, assets, templates, a custom branded donation page for your followers, and more.

## Custom donation page

# THE FUTURE OF CANCER THERAPY FOR DOGS

## Early Detection and Vaccine to Treat

-  We are developing a simple, antibody-based blood test for dogs
-  The only test with HIGH SENSITIVITY for detecting stage 1 cancers
-  Today, we have vaccines to treat **any** stage-1 cancer in dogs
-  Today, we're pre-making Neo-Antigen Vaccines for any cancer

# VACCINE DEVELOPMENT

## Largest Globally

We are conducting the world's largest study, Vaccine Against Canine Cancer Study (VACCS), among 800 dogs

## \$6.4 Million

Non-dilutive 6.4 million Grant from Open philanthropy awarded

## Ready for USDA

Conclusive Data over 4 years  
No vaccine safety issue  
Results are marketable

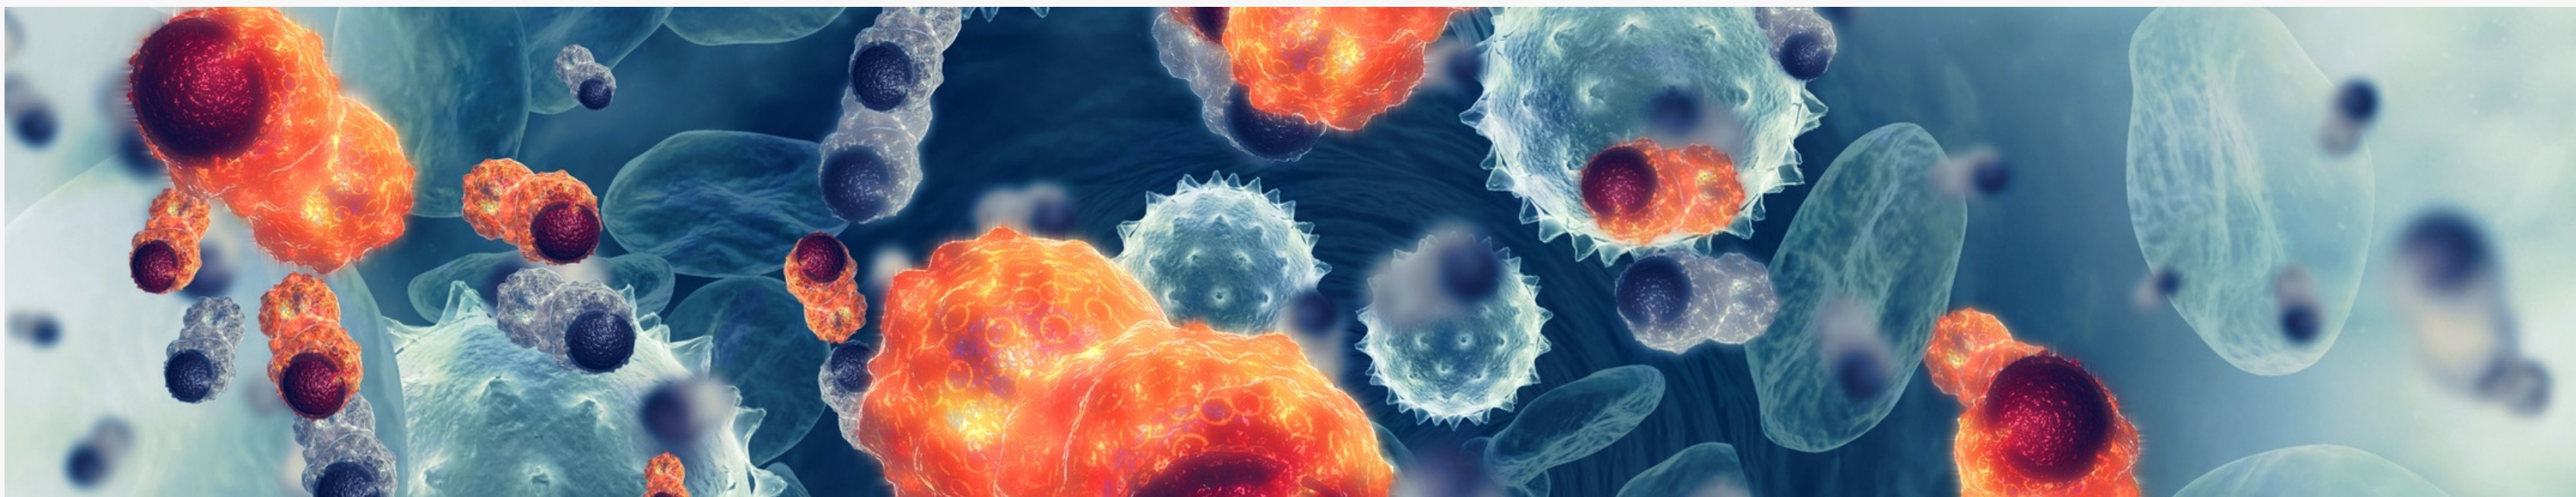

## All Major Cancers

Plans to test the efficacy (over 5 years) of a preventative vaccine against all major cancers; double blind, equal arms (In year 4)

# NEW ERROR SOURCE DISCOVERED IN TUMORS (FSNs)
